At the town meeting, Miss M. E. Dimond, superintendent of schools, gave an interesting report of the town schools. Our teachers, she said, have been doing more and better work than last year. They are studying the methods of other teachers with persistent effort to learn the best method; they are energetic, enthusiastic and progressive; the pupils attentive, studious and obedient, and the year's work on the whole seemed to give promise of good results. Our pupils, she says, compare favorably when entering the Academy with those coming from adjoining towns. Many obstacles are still to be overcome. Our schools cost about \$23 for each pupil, but many of the schools are so small that a large per cent of this must be expended for transportation or tuition in adjoining towns. The problem before the school board is how to make the money now spent of more value to the pupil than when spent for transportation.

Since using it my hearing is greatly im-proved, and the only time I have any catarrhal trouble is when I take cold. I

An Advertising Thought. When a merchant advertises he does

not pay for type, ink or paper. He pays for the effect in people's minds. It is as intangible as air, but as permanent as steel beams. Your investment in the minds and memories of people is a valuable asset. Do you realize what the continual appearance of an Bd. in The CALE-DONIAN means? It means that your store is indelibly impressed upon the minds of the thousands of The CALEDONIAN readers. This subtle influence is paying you every day a great deal more than you ever paid for it.;
